

Are you looking for a new challenge with creative freedom?

Do you want to take on responsibility and make your contribution to the company's success?

We look forward to receiving your detailed application!

Technical Project Manager (m/f/d)

The Company

CLERE AG operates in the renewable energy sector. The company invests in and operates solar plants, all in a European context.

For the company headquarters based in Berlin, we are looking for a "**Technical Project Manager (m/f/d)**" to fill a vacancy as soon as possible.

Job profile

- Technical support in the development, construction, acquisition and supervision of solar plants in Germany, Spain, Italy, Great Britain
- Solar plant optimization
- Optimization of existing processes for the purpose of data acquisition, processing and visualization in order to increase the profitability of the assets
- Preparation and analysis of technical due diligences

Applicant profile

- Completed training or degree with a technical/business focus
- At least 3 years of professional experience, ideally in the renewable energy sector
- Good analytical and organizational skills
- Strong communication skills, negotiating skills and assertiveness
- Team player, solution-oriented, independent and motivated to develop things further
- High standard IT skills: Microsoft 365, Sharepoint, database management and visualization software
- Fluent German & English written and spoken; Knowledge of Italian, Spanish or other languages and experience abroad are an advantage
- Willingness to travel for project-related stays
